Victron Energy opens new warehousing facility in Spain

For immediate release: Almere-Haven, Netherlands, 27 February 2014

Victron Energy is pleased to announce the opening of a new warehouse, close to Madrid. The first shipments, from this new facility, will commence on Monday, 3 March 2014.

This enhanced service will ensure even faster delivery, of Victron products, giving 90% of Spanish customers a next-day-delivery service.

All fast turnover products are held in stock at the Madrid warehouse. Any additional products are shipped from the Rotterdam facility, direct to customers, to ensure the fastest delivery possible across the entire Victron product range.

'Spain is an important market for us', said Matthijs Vader, MD of Victron Energy, 'and our new Spanish facility further strengthens our European stock holding of Victron products.'

By expanding into Spain, the Madrid stock holding facility increases the global reach of Victron's products and capabilities, with stock holding warehousing already based in Rotterdam-Netherlands, Maine-USA and Brisbane-Australia.

ENDS
